Why? And Who is it for?

ESADE's Master in Finance programme is directed at recent graduates interested in developing the skills and knowledge needed for a career in international finance, giving them a general and socially-responsible perspective of the role of companies.

By analysing the corporate financial decision-making processes and the detailed study of financial statements, you will gain a 360° vision of global financial markets. The knowledge you acquire in the classroom will be heightened by your exposure to ESADE's famously diverse and multicultural environment, giving you real and practical insights.

ESADE Difference

Global recognition: 13th in the world by Financial Times (June 2017).

Partnerships with international institutions CFA and Bloomberg: Our programme is recognized as the perfect basis for their examinations.

Specialised tracks: Corporate Financial Management or Asset Management & Banking.

Connection with CFOs: Learn directly from CFOs in leading global companies.

Objectives

By the time you graduate, you will have acquired:

Mastery of the fundamental tools and concepts of finance with a broad overview of capital markets and the corporate world.

An international perspective of the financial competitive environment and a high degree of competence to adapt to changes and confront challenges.

The capacity to research, analyse and make decisions considering the roles and interests of different stakeholders.

A global vision of organizations, focusing on the interaction between finance and company strategy.

“Leading recruiters seek out ESADE MSc in Finance graduates because they understand the value of the world-class programme we have worked hard to create. By seizing this opportunity you will equip yourself with everything you need to pursue an outstanding career in International Finance.”
