Anthropology: In Search of Principles for a Career Philosophy: Lessons from Art & Literature

UGRA_000510

Departments	Department of Society, Politics and Sustainability
Teaching Languages	English
ECTS	4
Teacher responsible	Ayuso Nogueiras Ana - ana.ayuso@esade.edu

Course Goals

A time for students to conceive a map of their priorities, strengths and motivations (a career philosophy) on which to base job and professional decisions. Other learning objectives are:

· to learn to extract useful lessons from ideas and experiences
· to encourage the desire to read and to expand one's humanistic knowledge
· to cultivate our appreciation for literature and art
· to have a more clear and refined sense of direction regarding our career about to start.

Previous knowledge

No previous knowledge is required.

Prerequisits

No previous requirement is required.

Recomended courses

This course is a continuation of the one of similar spirit called "Anthropology: In Search of Principles for a Life Philosophy: Lessons from Art, History and Economics." However, the contents are completely different and it is also addressed to students who did not take the above- mentioned course.

Description

Course contribution to program

The purpose of this course is to provide students with a time and a space to acquire useful self-knowledge that can help them make the right career decisions in the early part of their lives.
It is our belief that early adulthood and university are the time and the place for personal growth and humanistic learning, which will later become indispensable to navigate through the choices and uncertainties of one's professional life. No course can be a substitute for our own and very personal career decisions, but it's possible and useful to use classroom time shared with students facing the same dilemmas in order to obtain a sense of direction regarding "what to do in life".
The course offers students a supportive environment in which art is the tool to get to know ourselves better, and where we use the acquired self-knowledge to conceive a personal list of priorities, strengths and motivations (a career philosophy) on which to base our professional decisions.
Each session will be devoted to a specific dimension of a career or job (talent, motivation, contradictions) exemplified through the life and the work of eminent artists. A discussion will ensue to try to extract, with everyone's insight, a lesson or a principle enlightening and useful enough for us to want to remember and include in our "career philosophy". The discussions will be enriched with the ideas

obtained from short stories written by some of Literature's classic writers: Faulkner, Hawthorne, Dinesen, Fitzgerald and others.

Each participant can draw his or her own conclusions as well as count on the help of the professors to come up with his or her final map of priorities, strengths and weaknesses; but an important part of the course will consist of receiving and being open to the honest and constructive feedback from classmates: they can provide an external, different and sometimes more objective viewpoint to complement one's own. The discussions will adhere to only one requirement: that all thoughts and opinions are guided by generosity and a desire to improve.

The focus and commitment to the course that is expected from students is incompatible with using phones, laptops, tablets or other electronic devices. They will not be allowed during any of the different segments of our class time.
