Course Goals

The goal of this subject is that students will acquire knowledge encompassing the structure and legal boundaries, in addition to being equipped with tools and resources that the legal system furnishes entrepreneurs for conducting their market endeavors. This realm of law is commonly referred to as **business law**.

Upon successful completion of the course, students will have gained essential skills for making informed decisions infused with legal insights pertinent to business operations. This includes assimilating foundational criteria to comprehend, assess the appropriateness of, and broadly evaluate the guidance and undertakings of legal experts.

Previous knowledge

To have passed ESADE's assessment test and individual interview.

Teaching methodology

To achieve the objectives of the course, the subject is organized alternating lectures, in which the legal elements of the different topics of the program are explained, with case study sessions in which cases are analyzed where the legal concepts treated are addressed and their practical application in factual cases is verified.

Description

Course contribution to program

To have the essential legal training in order to know the regulatory framework that underlies any business activity is crucial for the sound management of any organization aimed at having a transformational and Social Impact.

Short description

Engaging in business activities necessitates a fundamental grasp of and adherence to the regulations governing the market, legal entities operating within it, labor relations, a multitude of contracts, and a diverse array of legal aspects that are bound by predefined and obligatory legal stipulations – collectively forming the legal framework of business operations.
