

Supply Chain Management

UGRA_009485

Departments	Dept. of Operations, Innovation & Data Sciences, Operations, Innovation and Technology Management (OITM)
Teaching Languages	English
ECTS	5
Teacher responsible	Frank Wiengarten - frank.wiengarten@esade.edu

Course Goals

The course learning objectives are:

- To understand the role of SCM in achieving competitive advantage.
- To recognize the key business processes in managing the supply chain.
- To understand the benefits of collaborative relationships throughout the supply chain.
- To evaluate the costs and inventory implications of different distribution strategies.
- To recognize the advantages and disadvantages of different transportation modes.
- To understand the role of purchasing in the supply chain.
- To know the various methods of contracting out and the most important activities that precede the supplier selection decision.
- To know how to structure the process of outsourcing.
- To understand the most important risks and pitfalls related to outsourcing.
- To develop a differentiated purchasing and supplier strategy.
- To measure and improve environmental and social sustainability in supply chains

Previous knowledge

This course is addressed to students with good business education background. It would be good if the students would have had a course on operations management

Prerequisites

The course is addressed to students with good business education background

Teaching methodology

The course adopts a hands-on approach and includes simulations, case resolution and presentation of theoretical frameworks and managerial decision making.

Description

Course contribution to program

This course contributes to the BBA by adopting a SCM perspective, complementing previous courses on Operations Management and strategy. It also contributes to develop teamwork and collaboration skills as well as critical thinking.
